PROFESSIONAL

QUALITY

MATERIAL

High quality brass in conformity with international standard as raw material, which has high density and pureness. After plating, it looks very smooth and bright. Selecting the environmental protection non-toxic silicone oil, can suppress the bacterium to grow and reduce the pollution.

PLATING

The surface of the AUDI faucet has its effective protection layer because the surface treatment has been through the processes as below: smoothing, polishing and chrome-plating. Let every workpiece shining and durable for long time.

CARTRIDGE

High quality ceramic cartridge is used for AUDI faucets. Stability, durability, security, non-toxic, smooth operation, adjustable temperature range of adjustment. Hardness comparable with diamond with excellent sealing performance, long-term use, impermeable to water.

QUALITY CONTROL 质量监控

All AUDI products have been made with the advanced technology and the top CNC machining processes. All products have been inspected professionally by many different ways such as material composition analysis, component inspection, process synchronous inspection, irregular round inspection, faucet high pressure and low pressure tightness test, component inspection, health testing, life testing to ensure that every piece is of top quality.

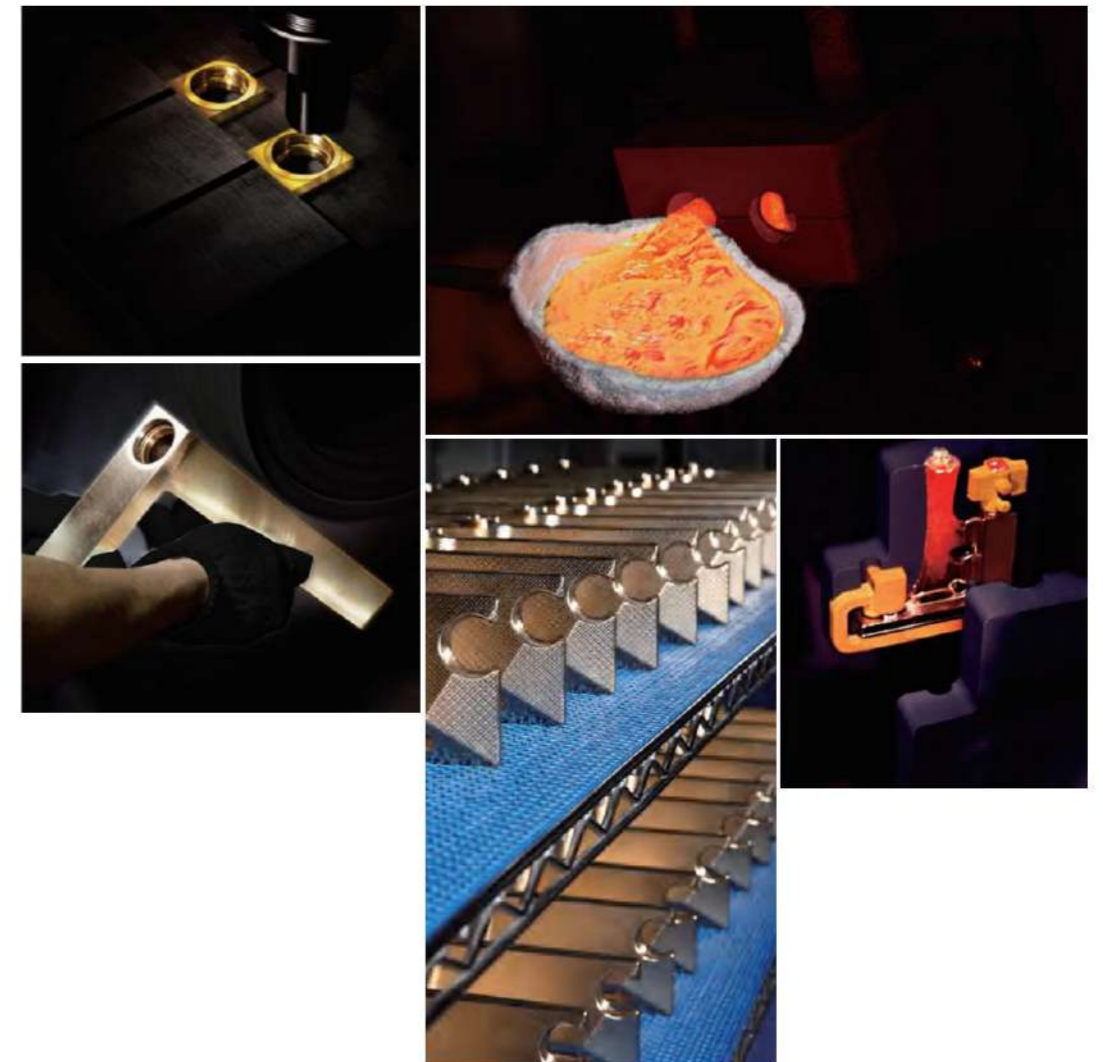

BUBBLER 起泡器

Original filter bubbler, water saving, reduce noise, to prevent splashing. Interpretation of the soft water. Easy removal and washing, worry more comfortable. And the bubbler professional wrench for the silicone soft lining material will not scratch the bubbler.

HUMAN DESIGN 人性化设计

Diversity designed this product to a more refined appearance. Into the concept of humanity, whether it is the handle design or water way, are people-oriented, considerate. Product design, superb technology not only on behalf of AUDI, but also shows the whole AUDI people ambition into the service of humanity.

As the global concept of bathroom is impacting traditional concepts, we have carefully discovered that, The design of bathroom products has shown diversification and simplicity. Jump out of traditional styles from materials and structural styles, and appear in a more natural and humane manner. Here, there are many classic representative works that awaken people to the fact that only the tranquility and distance of space can generate a lasting and fresh interest in life.

TOTUS SERIES

Lotus symbolizes purity and elegance and also: The real quietness lies in heart rather than body. The Crystal Lotus Series of guess Bathrooms makes perfect combination with lotus-shaped crystal and the hardware product, makes guess Products distinguish from others.

NAOMI

The shape is pure. Beauty of design.
Even the most fastidious purists will be moved.
A large number of circular design elements are used to express the most essential and pure concept.
Simple but perfect. Give people a delicate sense of detachment, send out a special charm.
Whether it's a washbasin or a shower
Or bathtub space, both practical functionality and visual beauty.

The dazzling golden appearance, unique design, and embellishment of the knurled handwheel are all outstanding in every detail. And the design of 'hiding' makes the product's sense of sophistication soar.

"CIRCLE" AND ART

The day and moon shuttle like a shuttle, and the night changes into the morning. The days increase and the years continue to grow. This showerhead cleverly combines Eastern elements with German craftsmanship, and showcases the cultural concept of "roundness" to the fullest, showcasing the harmonious beauty of Chinese style homes.

OFELLASERIES

The working principle of constant temperature faucet control is that the constant temperature valve continuously mixes cold and hot water to reach the predetermined temperature. Even if there is a change in water pressure, the thermostatic faucet will automatically rebalance the amount of hot and cold water to maintain the correct temperature. In the worst-case scenario, such as a cold water supply interruption, the hot water will automatically shut off to prevent burns.

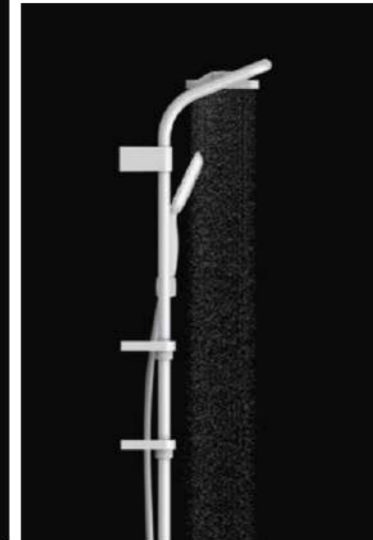

At the beginning of its design, GUESS Constant Temperature Control used the world's most sensitive thermometer - the sensation of human skin - as its design basis. The Opheli series combines fashion and functionality. Equipped with Jianlong constant temperature technology, the shower water temperature is always stable and comfortable.

Lock in temperature to prevent pulsation

After setting the water temperature, the valve core can automatically adjust the cold and hot water flow, balance the water pressure, prevent fluctuations in temperature, and easily cope with various complex water usage situations

Overheat locking safety and anti scalding measures

Equipped with overheat locking function, it can automatically turn off the hot water within seconds when the cold water is interrupted, effectively protecting your bathing safety

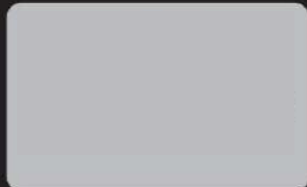

Ultra long lifespan and prolonged use

The Yanghe PPO constant temperature valve core can ensure no dripping after more than 50000 operations, far exceeding the national standard (GB18145) by 30000 times

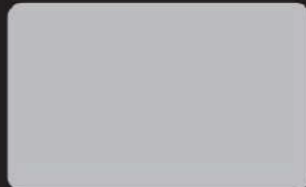

Far ahead in casting technology

The main body adopts Italian IMR gravity casting integrated molding, with high density, good strength, high resistance to 3 pressures, and can withstand water pressure of 3.5MPa, far exceeding the domestic blasting test standard (GB18145) of 2.5MPa

Easy, convenient, and fast installation

Can be directly connected to household water pipes, or used in conjunction with ball valves, suitable for various water heaters

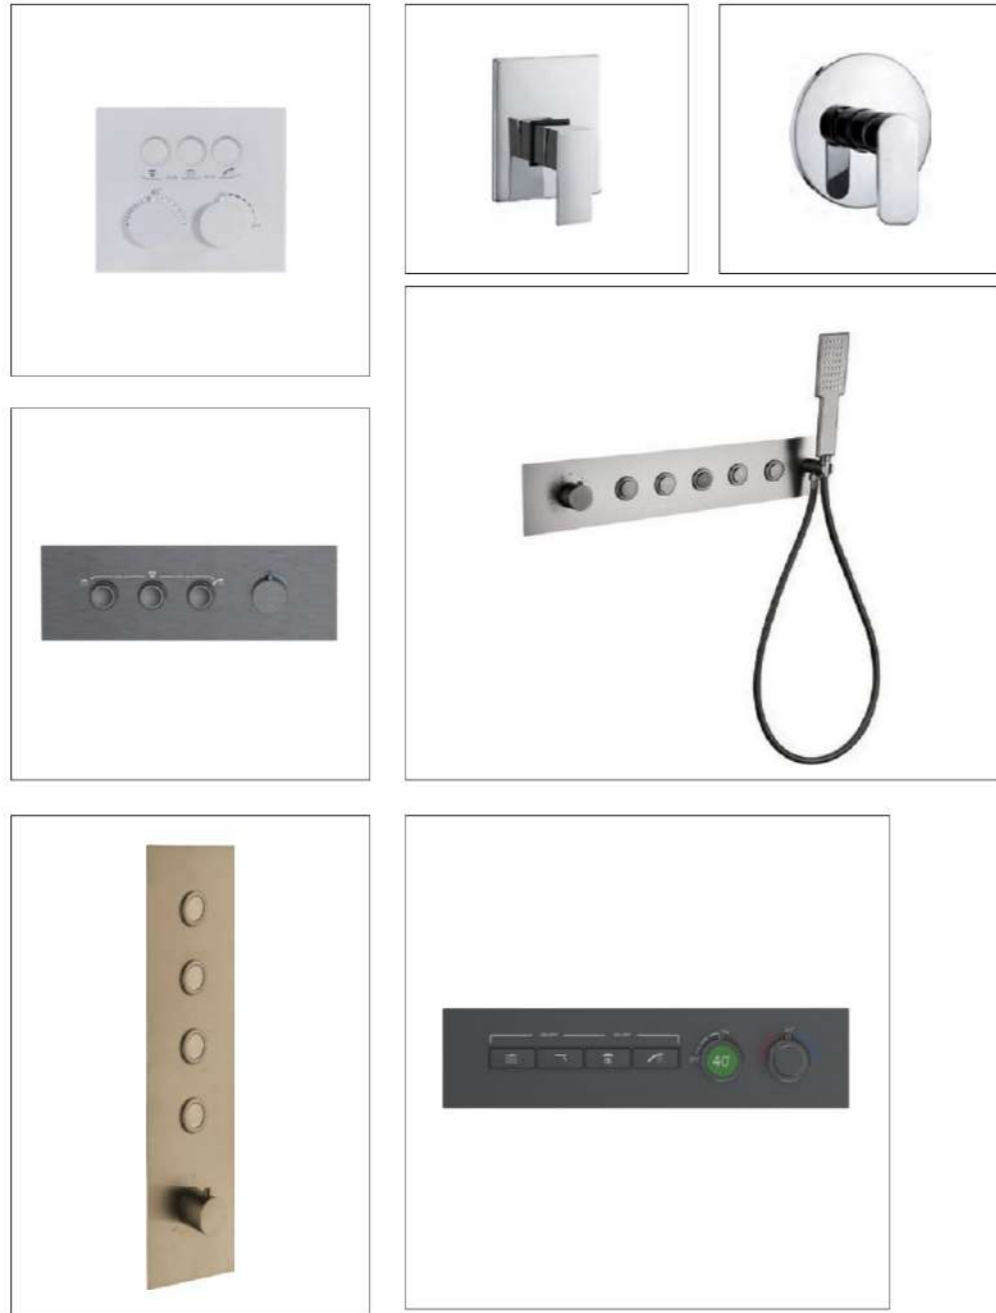

High sensitivity thermal element

National technology and domestic manufacturing of thermostatic valve core components adopt high-precision, high-sensitivity thermal sensitive components with the same technology as automotive thermostats, and their quality can be recognized

规划条件

Planning conditions

1. Project Condition

Requirements of bathroom
Wet and dry area must be separated and the electronic switch should must be installed in dry area
The area of bathroom should be watertightness and decorated byanfr-skidding tile.

2. Project Condition

Requirements of building
Ceiling thickness should be strong enough to install the 3201 luXuriousshower head which net weight is 25KG and reaches above 35KG when shower.
Ceiling height should be above 2.3M that can not affect the shower and the aesthetic effects.
Wwall fhickness should be above 1.5CM that make sure the pre-hiddenand installafon of facuet

3. Requirements of drainage

Water supply
The biggest work pressure:0.8Mpa The perfect work pressure: 1.5℃-65℃ The highest water temperature70℃ The perfect water temperature: 15℃-65℃
The number of shower people is defermes the lowest hot water supplythat everyone can fully enjoy the shower
The lowest hot water supply of this shower system should be at least above 250L.
The connection pipe of input and output water.
Two 3/4 (cold,hot) input water pipe Five 1/2 mixed water output pipe 8.Drainage system
The lowest tonage of drainage system is above 60L
Attention: Al water pipes must be washed before connect all componens of shower systemfaucet, shower head and body shower) in order to avoiddamage and block.

4. Requirements of power

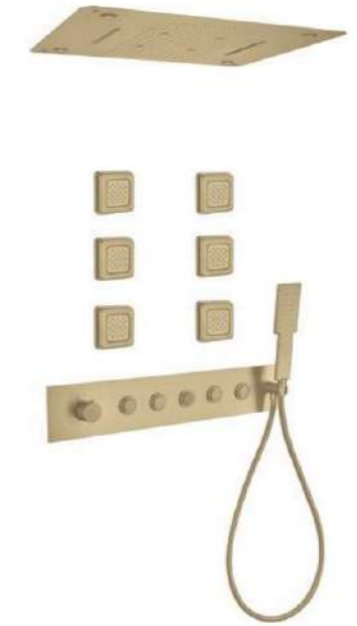

Power line :5X1.5MM
Power control switch must be installed in dry area.
Note: Install power fault protection device with 30MA rated current andthere is inside power transformer[Change to 12V safe power) of IEDshower head.

LIVING MINIMALIST

Elegant design builds into quality. The development of sanitary appliances has been inspired by organic forms of nature, this basin type cock has a coordinated curve, and the elegant design and beautiful surface sublimates the artistic conception of home furnishing.

MODERN BATHROOM DESIGN NEEDS OVERALL PLANNING

Beauty is in the eye of the beholder. For some, an apartment in a modern city is their dream home. For others, a rustic cottage in the country is their ultimate fantasy. Raleen has a wide range of bathroom products, including mixers, sprinklers, etc., to complement various interior design styles. It has both elegant classical outline and modern architectural style. To make it easier for you to choose the right products according to your budget, we divide our products into four categories according to price: excellent, excellent, supreme and luxurious.

Bathroom pendant series

When world concepts of sanitary ware strike traditional concepts, we find out that designs of sanitary ware products are becoming diversified and simplified. Materials and structures break away from traditional styles, products appear in more free, more personal manner. As witnessed by these several master works, people are reminded that only quiet space can produce lasting new living flavor.

SHAVING MIRROR SERIES

Bathroom products are no longer monotonous due to the fact that people are now fascinated by endless new ideas. Minimalist design is nevertheless the most suitable for people today. GUESS has redefined the meaning of circles as it highlights the bathroom's fashion by using some simple elements.

 Material: 304Stainless steel
 colour: Mirror/Brushed Silver/Brushed gold

Detailed introduction

Voltage	Wire direction
110V-220V 50Hz-60Hz	Left / Right

VABF119

Electric towel racks
 Function: Drying at a constant temperature of 55°C
 Size: 80x530x120mm
 Material: 304Stainless steel
 Colour: White/Matte

Detailed introduction

Voltage	Wire direction
110V-220V 50Hz-60Hz	Left / Right

AH1601

Electric towel racks
 Function: 45°C -70°C
 Size: 1200x500x1200mm
 Material: 304Stainless steel
 Colour: White/Black

Detailed introduction

Voltage	Wire direction
110V-220V 50Hz-60Hz	Left / Right

VABF108

Electric towel racks
 Function: Drying at a constant temperature of 55°C
 Size: 580x440x100mm
 Material: 304Stainless steel
 Colour: White/Black

Detailed introduction

Voltage	Wire direction
110V-220V 50Hz-60Hz	Left / Right

VABF1501

Electric towel racks
 Function: 45°C -70°C
 Size: 950x500x120mm
 Material: 304Stainless steel
 Colour: White/Black

Detailed introduction

Voltage	Wire direction
110V-220V 50Hz-60Hz	Left / Right

VABFA2033

Electric towel racks
 Function: 45°C -60°C
 Size: 475x750x920mm
 Material: 304Stainless steel
 Colour: Gunmetal/Brushed gold/Mirror

Detailed introduction

Voltage	Wire direction
110V-220V 50Hz-60Hz	Left / Right

VABF404

Electric towel racks
 Function: 45°C -60°C
 Size: 580x470x70mm
 Material: 304Stainless steel
 Colour: Brushed gold/Brushed Silver/Gray

Detailed introduction

Voltage	Wire direction
110V-220V 50Hz-60Hz	Left / Right
